

TOWING AGVs

Tribot 10T

Tribot 10T

Maximize your productivity by automating transport of your goods up to 10 Tn both indoors and outdoors.

With minimum dimensions, large capacity and great manoeuvrability, 10 Tn Tribot is a strong, easy, safe and flexible solution for horizontal heavy load transport and order picking over long distances.

- **STRONG:** High towing capacity in high performance use.
- **EASY:** Easy to set up, user-friendly interface and simplified maintenance.
- **SAFE:** Our AGVs are fully safety equipped.
- **FLEXIBLE:** Multiple navigation systems, magnetic or SLAM. Easy configurable routes. Automatic for indoor and outdoor use.

Dimensions (LxWxH)	1424 x 968 x 885 mm
Towing capacity	Up to 10 Tn
Automatic movement	Unidirectional Bidirectional (optional)
Speed range	From 350 mm/s to 1250 mm/s
Turning radius (w/o trolley)	1270 mm
Slope	5 % with 6.5 Tn
Manual movement	Control pad Clutch system (external tool - optional)
Guidance / Navigation system	Magnetic (surface/buried) Optical (optional) SLAM (optional)
Batteries	Lead acid Gel Li-ion
Recharge method	External charger Manual battery interchange system Wireless charging (induction)
Battery life	>16h
Autonomy	24/7
Safety elements	Safety laser for indoor or outdoor environment Safety PLC Anti-collision laser (optional)
Environment	Indoor Outdoor (optional)
Software interface	SIGAT
Communication	Radio frequency system WiFi 4G (optional)
Connectivity	2 x USB, Ethernet, IoT Through IT: ERP, MRP, MES, DDBB interface Industrial connectivity: OPC, wired connections...
